

Iris Is At Least Half Right. Censured Linda Stanley and the Terminally Broken 11th JD

During her press conference this week, Barry Morphew's attorney, Iris Eytan, uttered the words "Find Suzanne". April 19th marks one year since Barry Morphew was set free due primarily to prosecutorial incompetence and sanctionable misconduct. Next month will mark three years since Suzanne Morphew was likely abducted and murdered, likely by a sick spineless broken coward who is likely still roaming the streets of Colorado (maybe in YOUR town).

The "Find Suzanne Morphew" signs have come down in Salida, just in time for tourist season.

The truth is, nobody is really looking for Suzanne Morphew anymore.

Not Barry or Mallory or Macy or Iris or even law enforcement for that matter.

Many do not agree with Iris that Barry Morphew is innocent of murdering Suzanne Morphew. The truth is, Barry Morphew was not found innocent, and the court record proves that his case was dismissed due primarily to chronic incompetence and inaction by DA Linda Stanley and her office. I alleged in my initial OARC RFI (August 2021) that DA Linda Stanley violated Barry Morphew's rights, thereby destroying any shot at justice for Suzanne Morphew. Assignment of a special prosecutor might be the only way to learn the true facts of that horrific case.

Former / potential future murder suspect and current voter fraud forger on probation, Barry Morphew is not the urgent story.

While leveraging famed chipmunk hunter Morphew and promoting her non-profit, Iris barely touched on the greater and more urgent story – there are dozens of documented, actual VRA and Pattern and Practice violations across the 11th JD resulting in dismissals, reduced charges, and alleged murderers and sexual predators back out on the streets of Colorado to re-offend (maybe in YOUR town).

This is an urgent matter that should be addressed immediately.

DA Stanley emerged briefly from her secret den, a day after Iris, to respond to the flurry of news reports. As expected, Linda cast her usual shadow of absolute denial - thereby ensuring many more weeks of the same incompetent arrogant mismanagement of the 11th JD.

The truth is, OARC has been investigating DA Linda Stanley long before Iris submitted her RFI. OARC has been investigating Linda Stanley formally since January 2022, and they were notified formally of her alleged CRPC violations on August 30, 2021, nearly two years ago. So, let's ensure the record is straight. This has not been weeks or months of investigation. This has been nearly two years of investigation.

Governor Polis and his senior leadership team know this is true because each of them has received this detailed information from me - from the very outset.

How many months did it take for OARC to investigate and sanction political character Jenna Ellis? That case seemed to open and close very quickly. How many months to adjudicate RFIs from Sheriff Allen Cooper in the 11th JD? What was that outcome by the way?

As an average citizen with a day job, no legal training, and the usual citizen stuff to juggle each day, I suppose it's easier for you to drag, obfuscate and otherwise delay my formal inquiries with little risk of exposure. Let's see how long it takes you to institute corrective action across the 11th JD now that a nationally recognized, prominent, and outspoken attorney steps up to the podium.

Here is yet another small detail that should already have been addressed through proper oversight and leadership. Wendy Owens should not be employed by the 11th JD or any Colorado JD - failure to abide by Colorado Rules of Professional Conduct (CRPC 8.3 Reporting Professional Misconduct) and Colo. R. Civ. P. 242.11. Both censured Wendy (Wyoming) and her censured boss, DA Linda Stanley, had a duty to report her 2022 censure to OARC.

OARC has taken far too long to act and stop the ongoing harm inflicted on victims and their families across the 11th JD.

COAG and Governor Polis have been aware of DA Stanley's incompetent, arrogant and reckless mismanagement of the 11th JD since 2021. COAG has received incontrovertible detailed evidence of Victim Rights and Pattern and Practice violations - numbers that transcend the infamous 12th JD and Alonzo Payne. Despite a mountain of factual documented information, our Colorado leadership appears to have chosen to "monitor the situation" from the sidelines.

It is way past time for AG Weiser to be appointed to the 11th JD and assign a special prosecutor to begin the work of restoring constitutionally guaranteed rights of and the prospect of justice for ALL of these families.

How incredibly ironic that the protracted aim of OARC and COAG to ensure due process for these seemingly incompetent and extremely dangerous Colorado Prosecutors is absolutely trampling the rights of dozens upon dozens of Colorado citizens - both defendants and victims / families, while undermining the work of our already stretched law enforcement. And the list is growing by the day.

Please join me in asking Colorado state and local leaders to acknowledge the real urgency here, cut through your own bureaucracy, convene a meeting, and take immediate appropriate action.
